

Quick Start Guide for Control Solutions VP3-TM Text Messenger

You will want usually want to start by installing the VP3-TM configuration tool software. Once installed, go to the “Getting Connected” section of the i.Report VP3-TM User Guide to get started. You may also want to consult the wiring diagram in Appendix F. To view the user guide, click the blue question mark icon in the top toolbar after opening the configuration tool software.

To install the configuration tool software:

(1) Go to www.csimm.com and download the “VP3-TM Support Package” from the VP3-TM product page. Unzip the file downloaded. One of the files will be VP3-TM_Setup.exe.

(2) Double click the VP3-TM_Setup.exe program. This will start the installer which installs the configuration tool program as well as compiled help files. Grant permission for the installation to proceed as required by your version of Windows. After installation is complete, open the VP3-TM program, and click the blue icon in the top toolbar to view the user guide.

You can also view the entire User Guide for the VP3-TM online at <http://vp3-tm.info>. The only thing at this URL is the User Guide, so it is readily viewable from your mobile phone.

RS485 Adapter: If your order included the optional USB to RS485 adapter, simply plug it into your PC. It will automatically install the necessary drivers. The installation takes a while - typically at least 2 minutes. When installation is complete, you will be able to find your new serial port under Ports in your PC's Device Manager.
