The installer will check to see whether Visual C++ support is already installed on your system, and install it if not. This is standard software provided by Microsoft. If it has already been installed previously, it will ask whether to repair or uninstall. Select Repair.

When you get to the "Finish" screen, you are ready to go.

Next, proceed to install i.CanDrawIt. The first installer screen looks like this:

The installation directory should be the same directory that VP6-1430 was installed into.
